

## KS1 Geography Quiz - Maps - Categories (Questions)

This quiz addresses part of the requirements of the National Curriculum KS1 for children aged 5 and 6 in years 1 and 2 in Geography. Specifically it looks at categories or groups of things that might be found on maps. It is one of 50 quizzes to help you understand the world around you.

In geography you have found that there are lots of different places in the world. Some are hot and hilly, others are cold and flat. Some have lots of tall buildings, others are rural and spread out. In geography, just as in science, it is good to put things into categories. This also helps when you draw maps. On a map, all woods and forests are coloured green, for example. In this quiz you need to decide which groups or categories different things belong to.
